**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1,4,6-7,9,12-23,25,46-52,73-76 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Shah.

See the appropriate paragraph of the 10/2/07 Office action.

***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 77 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shah.

See the appropriate paragraph of the 10/2/07 Office action.

***Response to Arguments***

Applicant's arguments filed 8/28/08 have been fully considered but they are not persuasive.

Applicant states Shah fails to teach a structure that defines the size of the sponge by a configurable distance between the collector and the handle portion. The does not agree. Shah teaches in column 4 lines 30-34 slot(52) the retains the sponge(56) in a compressed configuration. The Office has properly read slot(52) as defining the size of the spong(56).

Applicant states Shah does not teach a “built-in gauge” for determining when sufficient sample is collected. The pending claims require the “blocking portion” to be engaged with a

Art Unit: 1797

portion of the handle. The Office maintains the outer portion(48) of shaft(40) is engaged with the handle(40) and blocks the expansion of the sponge(56) which has been properly read on the pending claims.

Applicant state the Office has described the sponge(56) as having a first size(52) which is not understood because the taught element “(52)” is a slot(52). Shah teaches in column 4 lines 30-34 slot(52) the retains the sponge(56) in a compressed configuration and this compressed configuration is what the Office intended by a “first size(52)”.

Applicant traverses the 35 USC 103 rejection stating that more than a perforated disk separate Shah and the instant claims. The Office maintains all of the rejections of record are proper.
